

### How to insert pictures into a discussion forum posting at TrailAdvocate.org

First, pictures should be resized to allow us to conserve disk space and also for proper display. Photos should not be larger than about 800 by 600 pixels. Many photo programs will allow you to resize your photos before uploading them.

Select your file(s) from your local system. You can select multiple files. Once you have selected all the files you wish to upload:

The screenshot shows a web interface for file uploads. At the top, there are three buttons: "View Existing Image Uploads", "View Existing Media Uploads", and "View Existing File Uploads". Below these is a "Select files" section with a plus icon and the instruction "Add files to the upload queue and click the start button." A table lists the selected file:

Filename	Status	Size
WanderersPeak-1985-OverviewSmall.jpg	0%	41 KB

Below the table, a yellow callout box labeled "1" points to a green "Start Upload" button. The bottom status bar shows "1 files queued", the "Start Upload" button, and "0% 41 KB".

The file should be placed in your posting wherever the cursor was when you started the process. In this example, another photo was uploaded after putting in some text:

**Add Reply: How to post pictures to the new forum**

**B I U** [List Bullets] [List Numbers] [Quote] [Code] [Link] [Image] [Table] [Undo] [Redo] [Text Color] [Background Color] [Link Icon] [HTML] [ABC] [Table Icon] [Image Icon]

Paragraph [List Bullets] [List Numbers] [List Bullets] [List Numbers] [Undo]

This is some text and another upload
